

The background of the image is a photograph of a large, modern hospital building with multiple stories and many windows. The building is surrounded by greenery, including trees and manicured lawns. In the foreground, there is a road with a white curb and some small trees. A large, stylized ECG (heart rate) line is overlaid on the image, starting from the left and extending towards the right. The line is black and has a blue shaded area underneath it. The text "Med Concept" is written in a large, black, sans-serif font, with the "Med" part partially obscured by the ECG line. Below "Med Concept" is the text "Complete Medical Solutions" in a smaller, blue, sans-serif font.

# Med Concept

Complete Medical Solutions

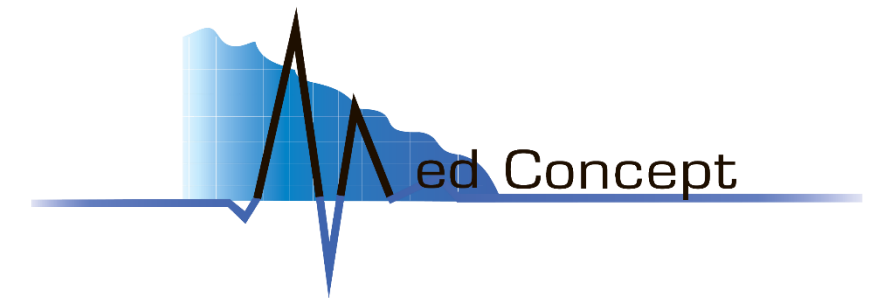

"Med Concept Turkmenistan" was founded in 2007 in partnership with "Med Concept Europe S.A." - Belgium. The company's core activities include the supply of medical equipment and related items, whether for turn-key projects or under tenders held in Turkmenistan. These operations leverage the resources of our headquarters, along with sales, service, and logistics centres across Central Asia, as well as in Algeria and Lebanon. We partner with and distribute products from over 350 leading manufacturers in Europe, the United States and Japan, specializing in medical equipment, instruments, furniture, and consumables. Our services include, but are not limited to:

- Financial consultation tailored for medical projects, coupled with comprehensive support in crafting business plans;
- Preparation of preliminary design and budgeting for all types of clinics with adaptation to local norms, including expert advice on departmental setups, manufacturers, equipment, models and configurations;
- Tailoring medical plans to existing architectural projects and fostering close collaboration with construction companies;
- Preparation of Room-by-Room (room-specific equipment list), developing medical detailed designs, including sectional designs for mechanical and electrical connections;
- Construction supervising with technical expertise throughout the execution phase;
- Procurement and installation of medical equipment, accessories, furniture, and consumables, including the delivery and setup of medical gas supply systems and specialized medical doors.
- Comprehensive service assistance, encompassing both warranty and post-warranty support.

"Med Concept Turkmenistan" product and service specialists hold over 300 certificates issued by manufacturers. We employ top-tier tools, testing, and auxiliary equipment across a diverse range of projects, ensuring seamless execution on multiple projects simultaneously. Since 2007, companies have delivered over 130,000 units of equipment, instrument sets, and medical furniture to hospitals in Turkmenistan.
